

MEASLES UPDATE

If you have any of the following symptoms or have been exposed to someone with symptoms in the past 7 days, please put on a mask and notify the hospital staff immediately.

- Fever
- Cough
- Runny Nose
- Conjunctivitis/pink eye
- White Spots in Mouth
- Rash

Please do not visit patients if you have any symptoms.

Measles is a highly contagious infectious disease caused by the measles (rubeola) virus. The symptoms (fever, fatigue, cough, runny nose, conjunctivitis/pink eye) usually begin 8-12 days after exposure with rash onset 2-4 days later. The rash usually begins around the ears and hairline and then spreads down to cover the face, trunk, arms, and legs.

Thank you for your cooperation.
